

Exact Color Matching—*every time.*

Premier Aerosol prides itself on reliable custom color matching and filling of all types of aerosol and non-aerosol paints. Marred surfaces on painted products caused by hook marks, assembly processes, on-site installation, and shipping and handling can require scrapping or re-work.

Companies rely on Premier Aerosol to produce perfectly-matched touch-up paint as the ideal alternative to costly scrapping and re-work. Premier Aerosol offers short lead time for both large and small batch runs.

Color Matching

Color matching is the critical process on which Premier Aerosol has built its reputation. We have experienced technicians and the finest instruments to produce consistent exact color matches. We utilize the latest color matching technology to match any color standard or actual customer part. We work closely with our customers and understand their product specifications to arrive at a complete evaluation. Identifying the color standard to be matched is just part of our proven evaluation process. It also includes understanding the product substrate, type of finish, and prescribed packaging and shipping processes. Quality is observed for every job, large or small, to ensure the color match is exact every time. This includes:

- Visual Analysis
- Computer Analysis
- Aerosol Automation and Stability Tests
- Special Requirement Analysis

Automated Formulation and Consistent Batch Preparation

Our color-matched paints can be filled and packaged in a wide variety of containers. Private labeling is also available.

Aerosol Cans

Our aerosol packaging operation includes state-of-the-art, fully automated injection aerosol filling equipment that handles a variety of sizes. Our popular aerosol cans provide the perfect touch-up and color blending on original equipment coatings. Aerosol cans are safe to use and are a quick solution over production spray guns. They are environmentally friendly, with no ozone-depleting CFC's.

Brush-In Bottles

Perfect for quick touch-ups, our Brush-In Bottles are available in clear plastic or glass, and in a variety of portable sizes and brush styles.

Cans

For production applications, our custom-matched paint can be packaged in traditional liquid containers: in pint, quart, gallon, or 5-gallon sizes.

Paint Pens

Designed with a precision-tapered tip, our Paint Pens fill the need for neat and quick touch-ups of scratched surfaces.
